My Family Is Living with a Rare Epilepsy

What are rare epilepsies?

Rare epilepsies are severe forms of epilepsy that cause frequent seizures or seizures that happen for a long time as well as many other complex health conditions. Rare epilepsy can begin as early as the first year of a child's life and lasts throughout their entire life.

Rare epilepsies can have a huge impact on a family's quality of life. The extra care that a child with a rare epilepsy needs and the unpredictable nature of seizures can disrupt family life. For this reason, siblings are at a greater risk for

has a sibling with a rare epilepsy.

anxiety and depression. They can also experience feelings of sadness, stress, isolation, fear, worry, and fatigue.

Why rare epilepsies make life unpredictable

Seizures can happen at any time. Emergencies at any time of day or night are a "normal" part of life. Because of this unpredictability, siblings may:

- Feel emotionally "off" or distracted
- Arrive late to school or other events or cancel last minute
- Be tired from lack of sleep
- Fall behind on assignments or projects

How you can help

My child is doing their best to navigate an extremely difficult situation—but your support can make a big difference.

- If you notice any changes in my child's mood or behavior, please feel free to reach out anytime.
- If my child is late, unprepared, or distracted, it would be helpful if you could share that with me.
- If you sense my child is struggling or falling behind, some words of encouragement can go a long way.
- If possible, please provide feedback on how my child is doing, including how well they're able to connect with you.

Thank you for everything you do to help support and encourage my child.

Our family's emergency plan Here is our plan for when their sibling has a medical emergency: During school or practice: In the evening: During the weekend: In the middle of the night: My contact info Name: Phone: In case you can't reach me, please call: Name: Phone: Relationship to child: Local hospital information:
